100% Practical Courses

Our concept of Practical Accounting & Taxation came up when the demands for skilled candidates in the field were high, but there was no formal training or guidance given to any candidate who wanted to enter into this field.

Our aim is to bridge the gap between theory classes of college and the real-world working environment of CA Firms, corporates and other companies. We introduced practical training courses to make sure that our students get the practical real-world experience while sitting in a classroom, so that they can easily transit into the real world with equivalent to two years of industry experience by the time they finish our courses.

With our Practical Courses, students get unique learning tools which integrate to help the student in understanding the concepts completely. We have also developed a strong Evaluation system to control and assess the quality of training.

Practical Accounting & Taxation Courses

Our course is a complete package that includes all practical aspects of Accounting and Taxation. Aspirants can take up these courses and have a complete understanding of Accounting, Income Tax, GST, TDS, Labour laws, Payroll, Excel, Tally, etc. We have created 5 specialisations of practical training for effective integration.

Course Features

We provide a vast array of contents for all our students so that they get an all round experience in the topics that they take up in our Institute.

LEARN

STUDY MATERIALS
